

WHAT TYPES OF ASYLUM SEEKERS ARE EUROPEANS LIKELY TO SUPPORT?

HUMANITARIAN CONSIDERATIONS

Europeans are more supportive of asylum seekers who are **victims of torture** than asylum seekers with no identified vulnerabilities. This pattern suggests that the public has partially internalized the central pillars of international refugee law.

ECONOMIC CONSIDERATIONS

Europeans are more supportive of **employed** asylum seekers, and they are more supportive of **doctors than farmers**. This pattern suggests that evaluations of the expected economic contribution of asylum seekers play an important role in structuring public attitudes.

RELIGIOUS CONSIDERATIONS

Europeans are less supportive of asylum seekers who are **Muslim rather than Christian**. This pattern is more pronounced among voters who are on the right of the left-right ideological spectrum.
